- AWS Services: S3, EC2, Lambda, SQS, Redshift, DynamoDB, Athena, Glue, API Gateway
- Build Tools & Containers: Docker
- Version Control and Documentation: Git, Bitbucket, Jira, Confluence

WORK EXPERIENCE

Wisdomleaf Technologies Pvt Ltd

Aug 2021-Present

Project - Wowcher | Data Engineer

May 2023-Present

- Optimized ETL data pipelines using Apache Airflow and AWS Redshift, **reduced processing time by 40%**.
- Enhanced SQL queries to improve pipeline **execution efficiency by 70%**.
- Led the migration of Airflow pipelines from version 1 to 2.
- Developed custom Airflow operators and hooks to integrate with internal systems, increasing team productivity and code reusability.

Project - Genamet | Python Developer

Aug 2021-Apr 2023

- Developed a personalized recommendation system leveraging AWS, Flask, MySQL, Elasticsearch and DynamoDB **increasing user engagement by 35%**.
- Integrated subscription module **automating billing process for 100+ customers**.
- Developed 10+ analytical dashboards in VueJS for actionable insights.

Vmoksha Technologies Pvt Ltd

Apr 2020 - Jul 2021

Project - GenieAli | Python Developer

- Automated backlink creation, website submission and web scraping.
- Utilized Django build API and user interface.

EDUCATION

Bachelor of Engineering in Computer Science, RGPV, M.P.

Aug 2015 - Jun 2019

PROJECTS

- Open Source Python wrapper for resmush.it API for image size optimization ([PyPi Link](#)).

CERTIFICATION

Astronomer Certification DAG Authoring for Apache Airflow ([View Certificate](#))
